HYDERABAD · INDIA

AETOS ONE · SMART HOME

Your home, aware and in control.

Lights, climate, security, energy and entertainment — running on one system that lives inside your home and keeps working even when the internet doesn't.

Local-first

Runs on a gateway inside your home. No cloud needed for daily control.

Retrofit-ready

Works with the switches, ACs, cameras and inverter you already own.

Always alert

Critical alarms reach you on phone, TV and speakers — even offline.

WHAT AETOS ONE DOES

Aetos One

One system. Every room, **every routine.**

Pick the rooms and functions that matter to your family. Add more later — the same gateway grows with the home.

Lighting

Dimming, warm-to-cool tuning and motion lighting. Scenes for dinner, movie, study and night.

Climate

ACs, fans and geysers on schedules and occupancy. Pre-cool before you arrive, switch off when you leave.

Security & CCTV

Cameras, door and gate sensors, sirens. Person and vehicle detection with a snapshot on your phone.

Energy & Solar

Live view of grid, solar, inverter and battery. Know what each room costs and shift heavy loads to solar hours.

Water & Utilities

Overhead tank level, motor auto-start, leak and low-pressure alerts. Never a dry tank or an overflow.

TV & Audio

One-touch movie mode. Alerts cast to the TV and spoken on speakers, then the show resumes.

Voice & Scenes

"Good night" locks doors, dims lights and sets the AC. Works with the voice assistant you already use.

Family & Elder Care

Fall and inactivity alerts, TV video calls with no buttons to press, medication reminders spoken aloud.

A DAY WITH AETOS ONE

It just quietly happens.

6:30 am

Curtains open, geyser on, gentle light in the kitchen. Solar status on the hall display.

9:00 am

Everyone's out. Lights and ACs off, cameras armed, gate locked. One tap or automatic.

2:15 pm

Courier at the gate. Snapshot on your phone, two-way talk, gate opened remotely.

7:00 pm

Car enters the driveway. Porch lights on, hall AC pre-cooled, welcome scene ready.

11:00 pm

"Good night." Doors checked, lights off, night path lighting on, motor scheduled.

WORKS WITH

Open standards, no lock-in.

Wi-Fi

HOW IT WORKS

Aetos One

Built to keep working when everything else fails.

The Aetos One OS Gateway sits inside your home and runs everything locally. Cloud is optional — used only for remote access and updates.

Critical alerts never depend on the internet

Smoke, gas, water overflow or a gate forced open — the siren, lights and TV alert fire locally first. The phone message is a bonus, not the only path.

Your data stays in your house

Camera footage, routines and usage history live on the gateway. Nothing is uploaded unless you turn on remote access.

Alerts by severity, not by noise

Info goes into a daily digest. Warnings reach you during the day. Critical alerts escalate until someone acknowledges.

AI that explains, not spies

Ask "why did the motor run twice last night?" and get a plain answer. Camera AI describes what it sees — a person, a vehicle, a package.

Keep what you already own

Existing switches, ACs with remotes, ONVIF cameras, solar inverters — we bring them in rather than replacing them.

Grows with the home

Start with one floor. Add the terrace, the gate, the guest room later. Same gateway, same app, no re-wiring.

01

Walk-through

We visit, map every room and device, and listen to how your family actually lives.

02

Design

A room-by-room plan with scenes and alerts, in plain language. You approve before anything is bought.

03

Install & train

Clean installation, usually without breaking walls. We hand over and train the whole family.

04

Care

Health monitoring of the gateway, updates, and a phone number that actually answers.

CHOOSE A STARTING POINT

Aetos One

Start small. Expand any time.

Three ways to begin. Every package runs on the same Aetos One OS Gateway, so upgrading is adding — never replacing.

Essentials

Apartments · first-time automation

- Lighting & fan control in living + bedrooms
- AC scheduling and away-mode
- Door / gate sensor with phone alerts
- Phone app + voice assistant
- Two ready scenes: Away, Good night

MOST CHOSEN

Comfort

Independent homes · families

- Everything in Essentials, whole home
- CCTV with person & vehicle detection
- Energy view: grid, solar, inverter, battery
- Tank level + motor automation
- TV pop-ups & spoken alerts
- Wall tablet dashboard

Complete

Villas · farm houses · elder care

- Everything in Comfort, multi-floor
- Gate & visitor management with talk-back
- Elder care: fall, inactivity, TV video calls
- Curtains, garden irrigation, pool/pump
- On-site AI assistant, fully offline
- Priority care plan

"What if the internet goes down?"

Everything keeps running. Schedules, switches, scenes and sirens are local. Only remote viewing waits for the connection.

"Will it break when a phone or app updates?"

No. The gateway is the brain, the phone is just a remote. We manage gateway updates for you under the care plan.

"Do I have to redo my wiring?"

Rarely. Most homes use retrofit modules behind existing switchboards. We tell you upfront if any room needs a wire.

Let's walk through your home.

A free visit, a plain-language plan, and a quote only for what you actually want. No pressure, no jargon.
