LEDGER
SMART ACCOUNTING PLATFORM

LEDGER

Bookkeeping that stays yours.

Multi-tenant accounting with notifications built in. Schema separation, database isolation or app containerisation per organisation. Send invoices over WhatsApp, Telegram or email — and let the ledger update itself when the customer confirms payment.

3

isolation methods —
schema, database,
container

3

notification channels
— WhatsApp,
Telegram, email

50+

organisations on one
install

4

ways to run it —
cloud, self-hosted,
on-prem, white-label

Nine modules.

One double-entry spine.

Create, send, track and reconcile invoices across every channel — with the ledger updating automatically when customers confirm payment.

ISOLATION

Schema separation

Each organisation in its own PostgreSQL schema within the same database. Row-level security, separate accounts, cost-effective.

Schema-based isolation

Independent data

Cost-effective scaling

ISOLATION

Database separation

Dedicated PostgreSQL database per organisation for maximum security and compliance. Independent backups and scaling.

Separate DB instances

Full compliance

Independent backups

ISOLATION

App isolation

Containerised application instances. A container per organisation with isolated memory, CPU and independent deployments.

Containers

Isolated resources

Independent deploy

ORGANISATIONS

Organisation management

Complete org lifecycle. Create orgs, manage users, assign access, and switch between organisations seamlessly.

Org creation

User management

Multi-org support

CHANNEL

WhatsApp integration

Send invoices over the official WhatsApp Business API. Receive payment confirmations and auto-update ledger entries.

Send invoices

Confirmations

Auto-ledger updates

CHANNEL

Telegram bot

Free Telegram notifications and commands. Process payments, expenses and confirmations through bot messages.

Free bot API

Webhook processing

Command handling

CHANNEL

Email notifications

Send invoices and statements via email. Gmail, SendGrid, AWS SES or your own SMTP server.

SMTP config

Multiple providers

Automated reminders

NOTIFICATIONS

Smart notifications

Multi-channel invoice delivery and payment reminders. Delivery status and engagement tracked across all channels.

Multi-channel

Scheduled reminders

Delivery tracking

INVOICING

Invoice management

Create, send, track and reconcile across all channels. Automatic ledger updates when customers confirm payments.

Send invoices

Track status

Auto-reconcile

ALSO IN THE PRODUCT

The whole book, not just invoices.

Bookkeeping

Double-entry rigour, same as the incumbents.

Payroll

Included — not a paid add-on.

Inventory & fixed assets

Stock, assets, depreciation.

Reports & multi-currency

GST-ready, open REST API + webhooks.

Cloud, self-hosted, on-premises or white-labelled.

Same product, four deployment models. Start in our cloud, move to your own servers later, or resell it under your own brand — your data and your choice, always.

TIER 1 · COST-EFFECTIVE

Schema per org

One database, one schema per organisation. Row-level security scopes every query.

- Separate tables and accounts
- Backups per schema
- Best for agencies with many small clients

TIER 2 · COMPLIANCE

Database per org

A dedicated database and connection pool per organisation. Nothing shared but the application process.

- Independent backups and restore
- Independent scaling
- Passes most enterprise security reviews

TIER 3 · MAXIMUM

Container per org

Its own application instance with isolated memory and CPU, deployed and upgraded independently.

- Isolated resources
- Independent deploy cadence
- Own domain and certificate

Cloud

Fastest start · free to begin

- We host it — managed hosting and backups
- Automatic updates
- Unlimited users and invoices
- Upgrade as you grow for payroll + inventory

Self-hosted

One-time perpetual licence

- Download and run it on any server you control
- No subscription
- Full source access
- Your infrastructure, your backups · community + email support

On-premises

Enterprise · custom

- Installed and supported inside your own data centre or private cloud
- Dedicated install and migration team
- SLA-backed support · air-gapped ready
- Compliance and audit assistance

PARTNERS

White-label reseller

Revenue share

- Resell under your own brand — cloud, self-hosted or both
- Your logo, palette and domain
- No per-customer rebuild
- Reseller dashboard, billing and a partner support channel

Bookkeeping that stays yours. No vendor lock-in: full source on self-hosted, open REST API and webhooks on every edition, and per-organisation isolation tiers nobody else in the comparison offers. Move between cloud and your own servers without re-implementing.

Same rigour as the incumbents — plus the two things none of them offer.

Self-hosting and white-label branding, out of the box. ✓ yes · ~ partial /
higher tier · × no.

CAPABILITY	LEDGER	QUICKBOOKS	XERO	ZOHO BOOKS	WAVE	TALLY

Per-org DB isolation tiers	✓	×	×	×	×	×

Competitor features shown are publicly listed entry-tier plans as of 2026 and may change. Ledger's cloud edition starts free; current plans on the website.

"We migrated six years of Tally data over a weekend. Our accountant now closes the books in a day instead of a week."

Priya Menon
Finance Lead, Northbridge Retail

"White-labelling let us ship accounting inside our own SaaS in two weeks — we'd have spent a year building this ourselves."

Daniel Ortiz
CTO, Fielding Platforms

"Self-hosted mode was the whole reason we switched. Our data never leaves our own servers, and we still get every feature."

Sofia Bianchi
Controller, Meridian Nonprofit

Start building today.

Multi-tenant accounting, schema isolation and multi-channel notifications. No credit card required — deploy in minutes, or talk to us about on-premises and reseller terms.
